-- KERMADEC SPECIAL --

Enjoy the Charlotte Hamfest and after you take your treasures home, tune up the rig and work ZL1AMO, ZL1AAS, ZL1BQD or W6REC on Kermadec.

Look for ZL1AMO & W6REC on CW. ZL1AAS & BQD will hold down SSB. On the last schedule with Ron he stated they were ready and would take the diesel cruiser 'Shiner' for a test run this past Thursday.

Antennas and equipment will be super. If you have a receiver at all you can hear them. Check all the normal DX frequencies. When sending your QSL, keep in mind that they will have heavy expenses when they return.

All QSLs via

CW contacts to ZL1AMO

SSB contacts to ZL1BDQ

Arrangements thru the courtesy of the International DX Association and the Carolina DX Association will provide schedules for CDXA MEMBERS on 40 & 75 March 19th.
